

DID YOU KNOW?

Scotch Whisky is the world's leading international spirit drink, exported to over 200 markets.

Whisky can only be called Scotch if it is distilled and matured in Scotland. This is defined in UK and EU law, and is accepted internationally, ensuring that when you buy Scotch Whisky you can be sure you are getting the real thing.

Single Grain Scotch Whiskies, a key component of blended whiskies, are Scotch Whiskies in their own right. Their characteristics are as individual as those of each Single Malt Scotch Whisky.

A pub measure of Scotch Whisky contains only 50 calories - less than a standard glass of wine or half pint of beer.

The French drink more Scotch Whisky in a month than Cognac in a year.

The "cup o' kindness" in the familiar New Year song, Auld Lang Syne, written by Scotland's Robbie Burns, refers to Scotch Whisky, the spirit of friendship.

Queen Victoria, responsible in part for creating a demand for Scotch Whisky outside Scotland, used to enjoy a daily dram in her tea.

Scotch Whisky distilleries play an important role in welcoming visitors to Scotland. Around one million people visit distilleries each year.

Scotch Whisky is matured over many years - it should be savoured.

Please enjoy Scotch Whisky responsibly

Distilleries to Visit 2010

From the source of the water to the shape of the still, a distillery tour will help to explain what makes every Scotch Whisky different. No two distilleries are the same. Each has a unique setting and story, as well as a distinctive way of doing things that has evolved over many years.

Visiting a distillery allows you to indulge your passion for Scotch and, at the same time, discover the environment and meet the people that have done so much to shape that instantly recognisable taste.

No matter which distillery you choose to visit
- be it *island, mainland, large or small* - you can
expect great Scotch Whisky, a warm Scottish
welcome, and a fabulous day out.

Scotland is the home of Scotch Whisky and host to the greatest concentration of distilleries in the world. There are around 100, making Malt Whisky by the centuries-old Pot Still method or Grain Whisky in the Coffey or Patent Still which has been in use since 1831.

Few products are so closely linked with the environment, culture and people of their country of origin as Scotch Whisky.

Scotch Whisky is subject to a tight legal definition. Made only from barley and other cereals, water and yeast it can only be called Scotch if it has been distilled and matured in Scotland.

Distilled in a land of breathtaking natural beauty, it takes nothing from nature which nature will not replace.

It is a natural drink, a distillation of the riches with which Scotland is so abundantly endowed - fields of golden barley, water tumbling down glens of granite and over moors of peat; and cool pure Scottish air.

Scotch Whisky is classified in one of five main categories - Single Malt Scotch Whisky, Single Grain Scotch Whisky, Blended Scotch Whisky, Blended Malt Scotch Whisky and Blended Grain Scotch Whisky. Further legal protection for consumers is given to the regional names associated with Scotch Malt Whisky production -

Highland, Lowland, Speyside, Islay, and Campbeltown - according to the location of the distillery in which the spirit is made.

Scotch Whisky is Scotland's leading indigenous product, and is of major importance to the economy not only of Scotland, but of the United Kingdom as a whole. Sold around the world for more than 100 years, Scotch Whisky is now established as the leading international spirit drink, making it one of Britain's most important exports.

Many distilleries welcome visits by members of the public. It is often necessary to make arrangements in advance, but many distilleries have extensive visitor facilities and do not require prior warning of a visit.

ISLAY

Islay, a small island off the west coast of Scotland, may be only 25 miles long but is home to 8 distilleries.

The whiskies from this area have more than a hint of saltiness due to the fact that Islay is frequently lashed by Atlantic storms. Sea

spray blows across the island, impregnating the peat used in the malting of the barley and blows into the warehouses where casks of Scotch Whisky lie maturing, thus affecting the taste and aroma.

The result is that some of the Islay whiskies are pungent and powerful with a distinctive whiff of sea air in them. Other distilleries that are in a more sheltered location, and use less peat during malting have a gentler but still clearly identifiable character.

September

HIGHLAND

The **Highland** region is geographically the largest Scotch Whisky producing region. The rugged landscape and changeable climate, and in some cases, coastal locations, are reflected in the character of its whiskies, which embrace wide variations.

As a group, Highland whiskies are rounded, robust and dry in character, with a hint of smokiness/peatiness. Those near the sea carry a salty tang; in the far north the whiskies are more notably heathery and slightly spicy in character; while in the more sheltered east and middle of the region, the whiskies have a more fruity character.

SPEYSIDE

Speyside, a region that borders much of the length of the River Spey on the eastern side of the Highlands, is home to half of Scotland's Scotch Whisky distilleries which are drawn together around a system of rivers.

The whiskies of this region are noted for their elegance and complexity. The flow of water over hills of granite and through moors of peat, add a refined smokiness to many of the malt whiskies and the slightly more sheltered nature of the terrain imparts a specific gentleness and delicacy to their character.

LOWLAND

The **Lowland** whiskies are produced in the south of Scotland, identified on the map as the area south of an imaginary line between Dundee and Greenock.

Lowland whiskies reflect the calm, lush countryside of the region and tend to be light, soft and mellow and gentle on the palate.
